LAB & BIOTECH SKILLS

- Microbial isolation & cultivation
- Bacterial characterization
- Salt tolerance testing
- PCR & DNA extraction
- Gel electrophoresis
- Bioinformatics analysis

TECHNICAL SKILLS

Frontend
React.js, Next.js, JavaScript, HTML5/CSS3, Tailwind, DaisyUI

Backend
Node.js, Express.js, REST APIs

Database & Auth
MongoDB, Better Auth, JWT

Tools
Git, GitHub, Vercel

BIOINFORMATICS TOOLS

NCBI, BLAST, UniProt, PDB, SWISS-MODEL, Clustal Omega, PyMOL

LANGUAGES

Bangla — Native
English — Professional
German — Learning

CORE STRENGTHS

- Scientific research & lab work
- Molecular biology
- Problem solving
- Full-stack development
- API & database design
- Cross-disciplinary thinking

PROFESSIONAL SUMMARY

Biotechnology and Genetic Engineering student with hands-on laboratory experience in microbiology, molecular biology, microbial isolation, bacterial characterization, salt tolerance testing, PCR and DNA analysis. Focused on microbiology, genomics, bioinformatics and environmental biotechnology research.

Also experienced in building full-stack web applications with React, Next.js, Node.js, Express.js and MongoDB — including REST APIs, authentication, database integration, responsive UI and deployment. Interested in combining biological research with computational and technological approaches.

EDUCATION

Master's in Biotechnology & Genetic Engineering
Noakhali Science and Technology University | 2026 – Present | Noakhali, Bangladesh

BSc in Biotechnology & Genetic Engineering
Noakhali Science and Technology University | 2020 – 2025 | Noakhali, Bangladesh | CGPA: 3.45

RESEARCH PROJECT

Phenotypic and Genotypic Characterization of Salt-Tolerant Bacteria | Microbiology / Environmental Biotechnology

Working toward isolation and characterization of salt-tolerant bacterial isolates from agricultural environments in Noakhali, Bangladesh — covering phenotypic characterization, salt tolerance assessment, molecular characterization, and genomic/bioinformatics analysis for agricultural and environmental applications.

SELECTED PROJECTS

Sportnest | Full-Stack Sports Facility Reservation Platform
Next.js, React, Node.js, Express.js, MongoDB, Tailwind CSS, Better Auth | Live: sportnest-eosin.vercel.app

- Facility discovery/search, owner management tools, and full booking/reservation workflow
- Authenticated, protected routes with REST API and MongoDB integration; deployed on Vercel

Bloody | Blood Donation Management Platform
Next.js, React, Node.js, Express.js, MongoDB, Tailwind CSS, DaisyUI

- Connects blood donors with requesters via role-based donor, admin, and volunteer workflows
- Authenticated REST API, MongoDB data layer, and responsive dashboard interfaces

iDonate | Digital Crowdfunding Platform
Next.js, React, Node.js, MongoDB, JavaScript, Tailwind CSS

- Campaign management and digital donation workflow connecting creators with supporters
- User authentication and funding management with a modern, responsive UI

RESEARCH INTERESTS

Microbiology & microbial biotechnology • Salt-tolerant bacteria • Environmental biotechnology • Genomics & whole-genome analysis • Bioinformatics • Molecular biology • Agricultural biotechnology • Genetic engineering

CAREER INTERESTS

Biotechnology Research • Bioinformatics • Full-Stack Development • Computational Biology
